**Subject: Request for Testing and Report on Drinking Water Quality**

Respected Sir/Madam,

We kindly request your assistance in conducting a quality test of the drinking water available at our premises. Please arrange to collect the water sample and perform the necessary laboratory analysis to verify whether the water meets the required safety and health standards.

After completing the testing process, we request you to provide a detailed report of the results at the earliest possible time. This report will help us ensure that the drinking water supplied is safe and suitable for consumption.

Thanking You,
